

71-L Bearing installation tool set, light model, for ball bearings with internal diameter 10 - 50 mm, external diameter 26 - 110 mm

DESCRIPTION

The 37-piece bearing installation tool set, as a lightweight external mounting model of series 71-L, is used for the quick, precise, and safe installation of bearings and seals in craft, industry, and workshops. The set includes 33 impact rings made of impact-resistant polyethylene terephthalate and 3 impact tubes made of aluminum, as well as 1 SELECTHOR with two different impact inserts (PU/CA). The tool set enables damage-free installation of bearings without damaging shafts, bearing housings, or seal rings.

APPLICATION AREA

For the fast, precise, and safe installation of bearings and seals in craft, industry, and workshop.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- The combination of the impact ring and impact sleeve required for the installation of the ball bearing can be found in the table on the lid of the suitcase.
- Combining the impact ring and impact tube ensures that the installation forces are never transmitted through the rolling bodies of the bearing, thus protecting it.
- The included SELECTHOR hammer can be used flexibly by swapping the provided striking heads.
- Usable for mounting into the housing, onto the shaft, or both at the same time

OPERATION

- Pre-assemble bearing with the soft side of the SELECTHOR hammer
- Place impact ring and matching impact tube onto the bearing
- Strike the tube with the hard side of the SELECTHOR hammer to securely mount the bearing
